

# Streetwear Verification Checklist

Sp5der · Hellstar · BAPE · Eric Emanuel · Denim Tears

**How to use this checklist:** Run through each checkpoint when receiving your order. Items meeting all checkpoints = top-tier rep. Items failing 2+ checkpoints = standard-tier or below — negotiate price or request replacement before final acceptance. For category-specific verification protocols and price tier benchmarks, see the full guide URL at the bottom of this PDF.

## HELLSTAR (NFC tier verification)

### ■ NFC chip scan

Tap smartphone (iPhone NFC reader / Android phone) on inner neck label. Top-tier (Pika) responds with metadata; standard tier has no chip.

### ■ Web graphic embroidery

Embroidered cotton thread (raised texture you can feel). Heat-transfer printing = standard tier.

### ■ Fabric weight

Authentic Hellstar hoodie 380-450 GSM. Verify with 10×10cm panel on kitchen scale.

### ■ Color saturation

Compare to authentic reference; standard-tier prints fade in 5-10 washes.

### ■ Stitching density

Cuff/hem stitching: 8-10 stitches per cm.

## SP5DER (4 checkpoints)

### ■ Shark Hoodie zipper

Shark face graphic continuous across zipper line when zipped — alignment correct on both halves.

### ■ BAPE STA logo

Star + Sole logo placement: precise on heel for sneakers, chest for apparel.

### ■ Tag font

BAPE tag uses specific font weight; standard-tier slight font variation.

### ■ Fabric weight

BAPE hoodies 360-420 GSM heavyweight.
